

access to security

AirKey

Simply smart

AirKey. Simply smart

With AirKey the smartphone is the key. It increases your levels of security, flexibility and gives you full control over your doors. But what do you need? With an AirKey cylinder, a smartphone as well as Internet access you will be able to send your keys by text message (SMS) and to manage your electronic locking system online. Well, if that's not smart!

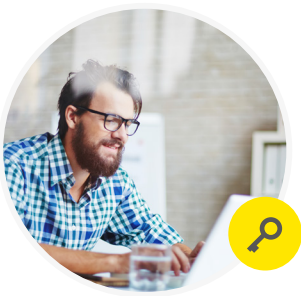

AirKey top features

- › Send keys via the Internet
 - › Free app and online administration
 - › For small and complex locking systems
 - › Maximum data security
-

Just as dynamic as customers' needs

AirKey is the electronic locking system for a new, mobile generation and a response to the dynamics of modern working worlds as well as our private lives. Send keys to smartphones via the Internet and benefit from maximum security standards.

George sends keys using the online administration

George manages an advertising agency. His team consists of a pool of different freelancers. Thanks to AirKey he saves himself from having to deal with tedious key management.

Encrypted + secure as per online banking standards

Authorisations are always saved in encrypted format in the online administration. The AirKey app on smartphones can also be secured with an individual PIN code.

KeyCredits – time-based credit and quantity credit

You require KeyCredits to issue new keys and change authorisations of existing keys.

Sophie receives the key on her smartphone

Sophie is George's new freelancer. She receives the key to the agency in a push notification. She received the prompt to install the AirKey app by SMS.

Sophie has no trouble finding George's agency and uses her smartphone to unlock the door

Thanks to cylinder GPS tagging Sophie had no trouble finding George's agency. The cylinder identifies her smartphone and authorises her to unlock the door.

KeyCredits 10, 50, 100 or KeyCredit Unlimited

Choose between quantity credit – 10, 50, 100 KeyCredits – or time-based credit – KeyCredit Unlimited for one or three years.

AirKey app and online administration

For iPhone and Android smartphones

Be it iPhones or Android smartphones, AirKey gives you the choice how to unlock your doors.

Send a key

Easily send keys to freelancers or holiday guests as part of push notifications. Including individual texts.

Geotagging

Smartphones know where locking system components are located and guide the way using the navigation app.

Office mode

Fully or semi-automatic office modes at certain doors and during certain times. Automatically takes into account public holidays and changes between summer and winter time.

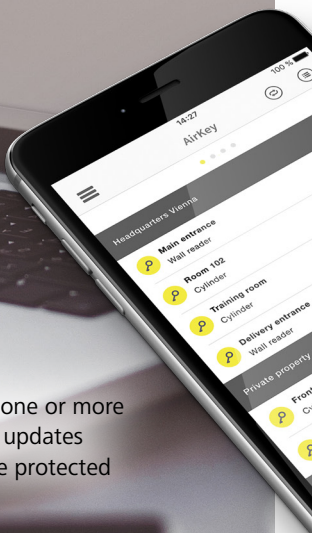

Component sharing

Simple share locking system components with tenants, e.g. in shared offices for individual management.

Multi-administration

Quickly and easily manage various company sites with several admins.

Free app for iPhone and Android

The AirKey app turns a smartphone into one or more keys for different systems. It creates and updates other access media and can optionally be protected using a PIN code.

AirKey handles every situation perfectly.

Be it sliding doors, archiving containers, delivery boxes or simple metal frame doors in the office, AirKey gives you full control at any time.

AirKey cylinder

Thanks to its modular design the cylinder is easy to install and can simply be adapted/elongated on-site at any time.

AirKey wall reader

Electronic locking elements, such as sliding doors, are actuated using the AirKey wall reader.

AirKey padlock

Suitable for barriers, depots and archiving containers in stationary applications.

AirKey cam lock

This cylinder completes your AirKey system thanks to its suitability for post boxes and filing cabinets.

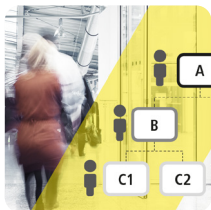

No smartphone available?

The AirKey system is also suitable for use with key tags, cards or combi keys.

Unique EVVA service

Since 1919, EVVA services have been focused on customer benefits. This has resulted in products adapted to the market, the best product and consulting service for customers and partners as well as a locking system expertise that boosts customer convenience and gives operators a competitive economic edge.

Master key systems from professionals

Master key systems define who has access to which facilities. EVVA provides comprehensive expertise in planning master key systems and electronic access control systems. The company's range also includes the calculation of high-performance locking systems with complex authorisation structures.

Mechanical and electronic locking systems

EVVA is one of the leading manufacturers that develops and produces electronic and mechanical locking systems in Vienna. EVVA's electronic and mechanical products can be combined in locking systems around the world depending on customer demands.

Excellent advice

EVVA is your reliable partner. Be it for technical queries concerning EVVA products or planning issues regarding a project, you can always count on EVVA.

Innovation made in Austria

Trust a family-owned business that has been researching, developing and producing for 100 years and operates in a respectful and cooperative way.
